Re: Supplemental Reply: A Request

Jose,

Yes, please let me know if it appears anything is missing  
from the  
attachments.

Regarding an electronic version of the time, pressure and  
temperature  
readings recorded during the fall-off test, unfortunately the only format  
of the data that I have is on paper.

Kathryn

Thank you Ms. Kathryn for your assistance with this matter.  
Following a  
preliminary review, it appears that the attachments to your last two  
e-mails transmitted without a problem, I will let you know if I miss  
anything from these attachments. Is there a possibility that the time,  
pressure and temperature readings recorded during the fall-off test may  
be available in an electronic format, meaning that the figures can be  
read from an electronic file?. I noticed that the table listing these  
readings is quite long, probably over 80 pages long. If you do have  
these tables on disk, I would appreciate your sharing them with us.  
Thank you again for your efforts, we appreciate your valuable  
assistance. Have a nice day. Sincerely,

Jose Eduardo Torres - 6WQ-SG

Supplemental Reply: A Request

Jose,

As mentioned in my previous email, attached is the WDW315 Crossroads Well Testing Report (copied from the TexCom Gulf Disposal, LLC application for WDW410, WDW411, WDW412 and WDW413) which includes core analysis information.

Please let me know whether you received the attached file okay.

Kathryn

Thank you Ms. Kathryn for your reply, I hope you had the opportunity to enjoy your vacation. We learned of Mr. John's retirement shortly after I wrote to you both, he is going to be missed for sure. I was asked some questions by my Branch Chief, and that is what prompted my e-mail.

I would like to take this opportunity to ask you if you have had the opportunity to review the fall-off data and the core data that were mentioned at the hearing. If you have copies of reports containing these data, I would appreciate your sharing them with us, especially if they are in electronic format. We have a copy of portions of the material in the application package, which was provided by Mr. Jim Neeley on a CD. Unfortunately, I could not find fall-off test data or core analysis data on this CD. I look forward to your feedback on this, have a nice afternoon and welcome back!. Best regards,

Jose Eduardo Torres - 6WQ-SG

Re: A Request

Jose,

Thanks for your inquiry which I found today upon returning to work from vacation.

The contested case hearing for TexCom Gulf Disposal, LLC ended at about 6:30 p.m. Tuesday, December 18. The attorneys have been working on post-hearing documents to be filed with the Administrative Law Judges. I will get back to you soon with more information. (By the way, John Santos retired from the TCEQ at the end of December.)

Good morning Ms. Kathryn, Mr. John:

Happy new year, I hope you had a nice holiday season!. I take this opportunity to ask for your assistance in obtaining an update on the latest developments on the contested case hearing and the application of TexCom. I have not had the opportunity to review any additional information on this matter following my trip to Conroe, other than the attached article posted on the Courier's website nearly a month ago. Your cooperation will be greatly appreciated. Regards,

Jose Eduardo Torres - 6WQ-SG
